

Doric Green Power GmbH & Co. KG

Two biogas facilities in the portfolio were sold in 2017 and an additional one in 2022. The investment company will proceed with the four remaining photovoltaic facilities.

The long-term economic success will depend not only on the long-term technical reliability of the plants, but also on future weather conditions.

MAIN PARAMETERS

Details of the investment entity	
Legal Form	GmbH & Co. KG
Equity	EUR 26,890,000
Type of income	Trading income
General partner	Doric Power GmbH

DEVIATION ANALYSIS

As the sales prospectus does not include any specific projects and therefore no annual forecasts, a reliable comparison of target and actual figures is not possible.

DETAILS OF THE ASSETS

Facility tpe	Location	State	Output	In operation since
Photovoltaics	Hollenbach	Bavaria	3,7 MWp	2009
Photovoltaics	Marktheidenfeld	Bavaria	5,6 MWp	2010
Photovoltaics	Oberottmarshausen	Bavaria	0,97 MWp	2010
Photovoltaics	Sonnewalde	Brandenburg	1,5 MWp	2010

The four photovoltaic facilities in the portfolio generate around 13.4 million kilowatts of electricity each year. This is sufficient to supply around 3,000 households with electricity. The performance of the investment depends on the results of the individual projects.
